EDUCATION

SMU School of Computing and Information Systems

Singapore

PhD in Computer Science

August 2020 – July 2025 (Expected)

Research Topic: Modeling Multiple Tasks in Recommendation Systems

VNU University of Engineering and Technology

Hanoi, Vietnam

BSc in Computer Science

August 2016 – July 2020

(Summa Cum Laude; Excellent Thesis Award)

Thesis: Vietnamese News Recommendation Using Language Model

PUBLICATIONS

Compositions of Variant Experts for Integrating Short-Term and Long-Term Preferences

Jaime Hieu Do, Trung-Hoang Le, and Hady W. Lauw

Under review

Dual-Target Disjointed Cross-Domain Recommendation Mediated via Latent User Preferences

June 2025

Jaime Hieu Do and Hady W. Lauw

To appear at SIGKDD Explorations 2025

Continual Collaborative Filtering Through Gradient Alignment

September 2023

Jaime Hieu Do and Hady W. Lauw

Proceedings of the 17th ACM Conference on Recommender Systems (RecSys'23)

PRIOR WORK EXPERIENCE

AIPI JSC

Hanoi, Vietnam

AI Engineer Intern

May 2019 – April 2020

- Designed and implemented a regression model to predict future user spending behavior.
- Developed a real-time face recognition system using InsightFace pretrained embeddings and a k-NN classifier with cosine similarity.
- Developed and integrated a Vietnamese news recommendation system powered by a language model trained from scratch.

PROJECTS

Cornac | [GitHub](#) | Contributor

- Description: Cornac is a flexible framework for multimodal recommender systems, supporting fast experimentation and easy integration with libraries like TensorFlow and PyTorch. It is recommended by ACM RecSys 2023 for evaluating and reproducing recommendation algorithms.
- Integrated PyTorch-based models with performance comparable to their Cython implementations.
- Developed a complete pipeline for session-based recommendation, including popular baselines such as GRU4Rec, SASRec, and BERT4Rec.

AWARDS & ACHIEVEMENTS

PhD Full Scholarship from Ministry of Education, Singapore, 2020 – 2025

Excellent Thesis Award VNU University of Engineering and Technology, 2020

#7 in Hate Speech Detection Competition: Vietnamese Language and Speech Processing 2019

Full Scholarship for top 5% excellent students, University of Engineering and Technology, 2016 – 2020

Bronze Medal Vietnam National Online Maths Contest, Vi-Olympic 2015 – 2016

ACADEMIC SERVICES & SKILLS

Reviewer: TORS

Skills: Machine learning, recommendation systems, deep learning

Programming Languages: Python, PyTorch
